

PUBLIC WORKSHOP

March '04

Welcome

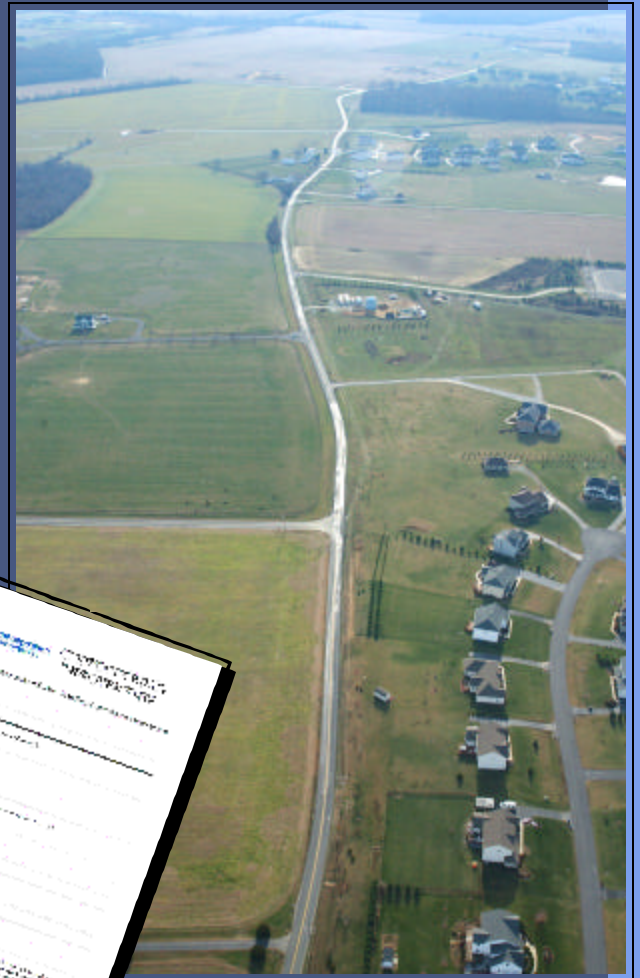

Welcome to a Choptank Road Improvements Project public workshop. The goal of the project is to improve the traffic operations and safety along Choptank Road, and public feedback helps determine the best ways to accomplish this.

In today's workshop, you are encouraged to explore the displays and talk to project team members about the project. Please take a comment form so you may write down any ideas, questions, or concerns you may have.

Your thoughts are important.

As you view the displays, you may want to think about these questions:

- Do you feel the suggested improvements will address the traffic and safety needs of the project area?
- Were concerns you had about the project addressed?
- Are there items about the project area that deserve more examination?

Choptank Road at Old School House Road.
